- ▶ Roof Tiles
- ▶ Roof Drain and Floor Drain
- ▶ Stair Nosing, Tile Trims
- ▶ Various PVC Profiles
- ▶ Geo Textile Coir Mats
- ▶ Plywood
- ▶ White Wood
- ▶ Polythene Sheets

CERAMIC AND PORCELAIN TILES

atlas concorde

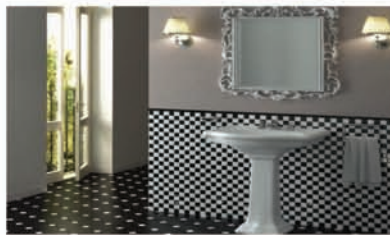

Founded in 1969, Atlas Concorde is the founder company of the Gruppo Concorde, the second largest ceramic tile group in Europe, with an annual turnover of 600 million Euros and 2,200 employees.

Atlas Concorde is known over the industry to provide tiles, introducing technology and aesthetic innovations that have become a point of reference for the entire ceramic industry.

Atlas Concorde guarantees that the ceramic tiles are produced in safe working environments, manufactured using carefully selected raw materials finished with the Italian expertise and know-how that is renowned across the world.

Ceramica
VOGUE

Established in 1978, Ceramica Vogue engineers and interior decorators, gradually acquiring a reputation as one of the leading manufacturers of glazed porcelain stoneware for floors and wall coverings. The superb technical performance and increasingly beautiful appearance are the characteristic features of ceramic vogue products, which comprise a wide range of collections designed to create innovative furnishing solutions for both indoor and outdoor areas.

Ceramica vogue, which belongs to the Altaeco S.P.A Group, currently produces 2,500,000 sq.m of tiles per year, has over 20,000 sq.m of indoor warehouse facilities and employs a staff of 200. More can be found at www.ceramicavogue.it

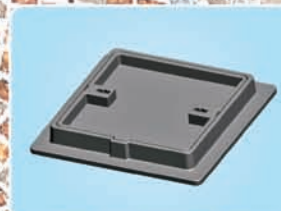

CIPA
GRES
continuità e innovazione

Cipa Gres started up in 1967 as a quarry tile manufacturer. Over the years the company kept its core business but also broadened its products' range, porcelain. The company has therefore become a point of reference in Italian as well as in International markets. The main target of its latest policies is the production of tiles for residential areas or trade spaces with an eye to Italian Design and to first-class outdoors or indoors design solutions. Moreover, Cipa Gres is fully committed to the safeguard the ethical as well as environmental rights.

Cipa Gres stands for innovation that keeps up with the current trends in architectural design.

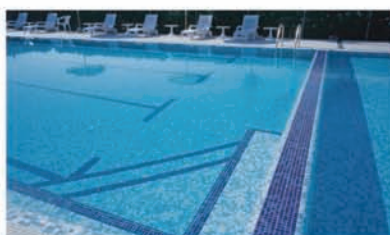

MANHOLE AND CHANNEL GRATINGS

Saime Ceramiche is the trademark of Nuova Riwal Ceramiche S.r.l. and represents one of the most important groups in ceramic industry. The prime product variants include porcelain stoneware with mass colouring, glazed Gres porcelain, ceramic stoneware dry pressed and glazed, single-fired and double-fired tiles.

One of the most important strategic elements of the company's development policy is to understand and satisfy customer needs: that's why "research as strategy" is a never-ending process for the whole group, aimed to offer higher qualitative and technological standards according to current design, colours and materials trends.

appiani

Appiani was found in Treviso in 1873. It has always stood out for its ability to innovate and the quality of its collections. Appiani ceramic mosaic offers unique technical and aesthetic features: precious Italian enamels and clays are ground and then joined together by co-penetration through dry pressing. The final product is a tiny mosaic tile which is extremely resistant to blows, abrasion and frost, perfect for covering walls and floors inside and outside the home and for decorating surfaces and volumes. The classic bathroom mosaic becomes a key technical and aesthetic element, taking on the connotations of mosaic for swimming pools and wellness areas, pathways and kitchen decoration.

COTTOFURNÒ

Cotto Furnò was established in 1920 with the production of hand-made bricks, roof tiles and floor tiles. In the early 70's with the aim to follow the increasing demand of the building industry, the Company started the production of tiles.

In the early 2000's, the aim to satisfy the customers' needs and to follow the market trend led the company to offer the new line of water-repellent, biodegradable treatment through a manufacturing cycle by immersion. This provides guard from efflorescence, considerable time saving during laying and treating operations and subsequent easing of the maintenance operations, without altering the natural beauty of the tiles.

PLEXOMARINE PLYWOOD, A Product of Highrise Trading.

Poplar film faced plywood is one of the most popular building materials for concrete construction.

It is lightweight, resistant to corrosion attack and water, easily combined with other materials and easy to clean and cut. Treating the film faced plywood's edges with waterproof paint makes it highly water - and wear-resistant. Due to its durability and easily handled surface it can be used in open environment in construction and building. Coating the film faced plywood with high-quality import films ensures handness and damage resistance. It can be used in conditions of high temperature drop, influence of moisture, detergent cleaning and provides protection against termites.
